WHAT AM I?

"I am a document which companies ask employees to sign. I contain guidelines which make it clear how staff are to use the company computer system. I might even tell them what could happen if they don't follow the rules"

ANSWER ....

"I am a person who tries to break into your computer system. I might do it just for fun to see if I can actually manage it. Or, I might want to damage or change your files. If I am caught, I will be prosecuted under the Computer Misuse Act"

ANSWER ....

"I am a piece of software that everyone should install. I only allow websites and people using trusted I.P. addresses to access the computer system and files. When you visit a new website, I will often ask you whether you trust this site"

ANSWER ....

"I keep track of everything that happens in the company computer system. I can keep records of everyone who tries to access the system from outside. I can also keep records of what employees are doing, for example, what files they open, change and delete and who they send them to"

ANSWER ....

"I am a piece of software code. I can be downloaded from attachments in emails, in exe files and from some web pages. I won't damage your hardware but I could damage or change some of your important files. Under the Computer Misuse Act, it is illegal to give me to other people"

ANSWER ....

"I am the year that the Computer Misuse Act was passed"

ANSWER ....
